Any person who may be affected by the amendment to Permit PE-2499 described below may, within 30 days from the date of posting, publication, service or display, state in writing to the Manager how he is affected.

Preamble — The purpose of this application is to update the existing permit to reflect changes in the fish-processing plant operation.

Seafood Products Company, 2727 Commissioner Street, Vancouver, B.C., hereby applies for amendments, as described below, to Waste Management Permit PE-2499, granted on November 21, 1974, which authorized the discharge of fish-processing effluent from a fish-processing plant located at Port Hardy, B.C., to Hardy Bay.

AMENDMENTS REQUESTED

Delete Appendix 02 from Permit (domestic effluent). Domestic sewage was formerly collected in a septic tank, with the outfall discharging into Hardy Bay. Sewage is now disposed of via the District of Port Hardy sewerage system.

The discharge of fish-processing effluent was formerly screened through a 36-inch Dorr, Oliver, Long Screen and discharged into Hardy Bay. A more efficient collection system, collection tanks and a pumping system directing the effluent through a 72-inch Dorr, Oliver, Long Screen, Model DOL 8214-1, and the provision of an enclosed recovery system for any potential overflow, has resulted in the control of all effluent. The screened effluent is then discharged through a 350-foot, 5-inch diameter pipe, to a location approximately 70 feet below the surface of tidal water in Hardy Bay, with no indication of discharged effluent surfacing.

Delete permittee monitoring program dated November 21, 1974.
